linkedin.com/in/junaid-ali

PROFILE

Independent full-stack developer working across the JavaScript ecosystem — from responsive front-end interfaces to REST APIs and database-backed services. Comfortable owning a project end-to-end as a freelancer: gathering requirements, building, and shipping directly with clients.

EXPERIENCE

Full-Stack Software Developer

Independent Freelancer

PRESENT

Design, build, and deploy full-stack web applications for clients using React, Next.js, Node.js, Express.js, and MongoDB.

Develop responsive, accessible user interfaces following modern HTML/CSS and JavaScript best practices.

Build and integrate RESTful APIs connecting front-end applications to backend services and databases.

Own the full project lifecycle independently — client communication, planning, development, testing, and delivery.

PROJECTS

Site Metrics

Web app for tracking and visualizing website performance and analytics data.

[Live](#) [GitHub](#)

Indeed Clone

Job-listing platform replicating core Indeed functionality — search, filters, and listings UI.

[Live](#) [GitHub](#)
